PROFESSIONAL SUMMARY

Cyber Security Engineer with a strong software engineering foundation in VAPT, cloud security architecture, and automated codebase analysis. **Certified in Cybersecurity (CC) by Isc2** and actively pursuing Certified Ethical Hacker (CEH), CISA, and CISM to combine offensive penetration testing with enterprise compliance auditing and technical infrastructure defense.

WORK EXPERIENCE

Cyber Security Engineer

June 2026 – Present

Virtuosoft — Karachi, Pakistan

- Executed *VAPT across* 400+ in-scope hosts and API endpoints of OTT, e-commerce, and NGO platforms, *identifying 450+ Security Findings & Vulnerabilities, including 140+ Critical and High-severity ones* mapped to *OWASP and CIS Controls*.
- Led end-to-end *PCI DSS* compliance consultancy, conducting gap analyses against *ISO/IEC 27001, NIST CSF, SOC 1/2, and HIPAA* frameworks & remediating 10+ core compliance gaps and executing *200+ validation re-tests* across production server environments.
- Configured *Cloudflare WAF* rulesets, audited multi-cloud assets across *AWS and Huawei Cloud*, contributed to internal *AI-driven SOC* product development, and provided *technical support in client pre-sales meetings* pitching VAPT and security reviews.

Experiential Trainee & Digital Presence Strategist

August 2023 – Present

Xcelliti Private Limited — Karachi, Pakistan

- Executed *VAPT* on Government portals, identifying 50+ gaps and *analyzed security testing* project executions under *ISMS and CMMI* Lead Auditors.
- Engineered the corporate website, researched & documented QA product, and drove marketing and event operations while assisting with internal HR recruitment pipelines and payroll administration.

Team Lead - Capstone Project

May 2025 – May 2026

10Pearls (FYP Accelerator Program 2026) - Karachi, Pakistan

- Led the core development, presentation & documentation of an AI codebase analyzer using *Python, Docker, and the PocketFlow framework* to automatically process complex repository logic.
- Built out a *RAG integration* utilizing *Gemini & OpenAI LLMs* and *Vector Databases* to help scan for system vulnerabilities and manage efficient developer onboarding.

INDEPENDENT RESEARCH & PROJECTS

Mugheeraat – Autonomous Agentic VAPT Lab

2026 – Present

Local & Available on GitHub

- Created an open-source blueprint standardizing local *Multi-Agent Orchestration*, deterministic *Safety Gates*, and *Testing Workflows*.
- Engineered a privacy-first CLI engine orchestrating *6 Quantized 8B Parameter Open-Weight LLMs* sequentially to automate tool execution, verification, and evidence-backed reporting, entirely air-gapped on *16GB RAM*.

Public Bug Bounty & Vulnerability Research

2026 – Present

BugCrowd & HackerOne

- Discovered and responsibly disclosed 30+ Vulnerabilities, including [CORS](#), [BOLA](#), [PII Leakage](#), [Disclosed Sensitive Data and Exposed API Keys](#).

Reverse Engineering of LLM-Generated Code

2025 – 2026

Applied Security Research — NED University of Engineering and Technology

- Disassembled and analyzed compiled binaries generated by [LLMs \(OpenAI, Google, Anthropic, xAI\)](#) using [Ghidra and Radare2](#), documenting repeatable vulnerability patterns and boundary-check failures in security-constrained code generation prompts.

FloXript – Intelligent Knowledge Builder

2025 – 2026

Applied R&D Initiative — NED University of Engineering and Technology

- Engineered an [AI security architecture](#) incorporating [Model Context Protocol \(MCP\)](#) and semantic embeddings to automate [threat-focused edge-case generation](#) and [identify security flaws](#) across complex codebases.

XploreLoct – Intelligent Event Ecosystem

2023 – 2025

Evolutionary Lifecycle Engineering Project — NED University of Engineering and Technology

- Designed a scalable Event Management System portal leveraging [Design Patterns](#), [DBMS](#), [Geolocation Mapping](#), and [Predictive Models](#) to accurately forecast attendee turnout.

AWARDS & ACHIEVEMENTS

2nd Runner-Up FYP Extreme

Procom — FAST National University of Computer & Emerging Sciences

2nd Runner-Up CTF & Cyber Trivia 2026

Cybersents — NED University of Engineering and Technology

Top 4% Candidate in National Skill Competency Test

HEC, P@SHA, PSEB, NCEAC & Virtual University

Runner-Up Web Development

CodeSphere — NED University of Engineering and Technology

SECURITY CERTIFICATIONS

- **Certified in Cybersecurity (CC)** — ISC2 | 2025
- **Certified Ethical Hacker (CEH)** — EC-Council | Training by NAVTTC at PAF KIET | Expected Nov 2026
- **Certified Information Systems Auditor (CISA)** — ISACA | Training at 3D Educators | Expected Nov 2026
- **Certified Information Security Manager (CISM)** — ISACA | Training in Progress | Expected Jun 2027
- **Introduction to Critical Infrastructure Protection (ICIP)** — OPSWAT Academy | 2026

SKILLS

- **Offensive Security & VAPT:** Penetration Testing, Threat Modeling, Vulnerability Lifecycle Management, Attack Surface Reconnaissance, API Endpoint Security, CTF Competency.
- **Offensive & Defensive Tooling:** OWASP Top 10, Burp Suite, Metasploit, Nmap, Wireshark, Kali Linux, Vulnerability Scanners.
- **Web, API & System Security:** BOLA/BFLA, IDOR, SSRF, Injection (NoSQL, XSS, CSRF), WAF Bypass, Business Logic Flaws, JWT/Session Security, SSDLC.

- **Cloud & Infrastructure:** Cloudflare WAF, AWS Security, Huawei Cloud, IAM (OAuth/Keycloak), Microservices Defense, Public Storage Security (S3/Firebase), Network Architecture (Firewalls/VPNs).
- **GRC & Frameworks:** ISO/IEC 27001 (ISMS), NIST CSF, PCI DSS v4.0.1, SOC 1, SOC 2, HIPAA, CIS Controls, COBIT, CISA Candidate, CISM Candidate.
- **AI Security & Development:** Model Context Protocol (MCP), RAG Architecture, Python, Docker, Vector Databases, Static Code Analysis.

EDUCATION

Bachelors of Engineering in Software Engineering (B.E.S.E.)

NED University of Engineering and Technology — Karachi, Pakistan
